May 7, 2012

SimpleCV¹, which stands for Simple Computer Vision, is an easy-to-use Python frame-work that bundles together open source computer vision libraries and algorithms for solving problems. The idea of this document is to provide a quick reference for switching from Matlab and OpenCV to SimpleCV.

Description	Matlab	OpenCV	SimpleCV
Reading an image	<code>imread('lenna.png')</code>	<code>cvLoadImage('lenna.png')</code>	<code>Image('lenna.png')</code>
